

Activity 3: UNDERSTANDING INTELLECTUAL REVOLUTIONS

MODULE 3

Name: SIRANO, AMICA PEA S.

Course, Year & Section: BSECE - 1D

Date: 19/3/2024

Instructions:

The class will be divided into four (4) groups. Read and discuss all the Intellectual Revolutions with your groupmates and complete the table by answering the guide questions. Each group will be assigned to one of the revolutions and will discuss their output in class.

Guide Questions	Copernican Revolution	Darwinian Revolution	Freudian Revolution	Turing's Revolution
What is the name of the Proposed Theory?	The heliocentric theory	Theory of evolution by natural selection	Psychoanalysis	Turing Machine Model
What is/are the main Concept/s of the Theory? (In bullet form, maximum of 3 answers, written in sentences)	• Sun centered system • Earth's rotation & revolution • Planet moving in elliptical orbits	• Variation • Inheritance • Natural Selection	• Id, ego, superego • Unconscious mind • Psychosexual stages of development	• Algorithm • Universal computation • Turing Machine (input, output, process)
What were the prevailing beliefs before the theory became widely recognized? (In bullet form, maximum of 3 answers, written in sentences)	• Earth was the center of the universe • The church's geocentric view was dominant • Celestial bodies were thought to move in perfect circles	• Species were believed to be fixed & unchanging • Humans were thought to be separate from other animals • Evolution was widely rejected	• Mental illness was mainly seen as a result of physical causes • The conscious mind was thought to be the only part of the mind • Sexuality was not openly discussed	• Computation was thought to be limited • Machines could not think or understand • Logic and math were separate from computing
Why does the theory become controversial?	It challenged already established religious & philosophical beliefs which sparked debates among philosophers	This contradicted the idea of special creation & that humans are part of the animal kingdom which sparked debates	This challenged the traditional views on self and was considered unscientific at first by many	It raised ethical concerns on AI because it suggested machines can think which made it unsettling
How does the theory transform society? (In bullet form, maximum of 3 answers, written in sentences)	• Changed how people viewed the universe • Led discoveries in astronomy & science • Encouraged open mindedness in consuming knowledge	• Influenced biology, medicine & agriculture • Changed views on human origin • Promoted the idea of adaptation & environmental change	• Developed modern psychology and therapy • Increased awareness of mental illness • Influenced literature, art and social thought	• Laid the foundation for AI & modern computing • Transformed technology, communication & data processing • Shaped the digital world and automation

Part B. Presentation: The instructor will provide the specific details and guidelines for your group's presentation.
